

```
program Laplace
*****
c Este programa resuelve la ecuación de Laplace en 2D
c utilizando el método de relajación y brinda a la
c salida tanto V como el vector E en los puntos de la
c grilla utilizada.
c
c La configuración que se incluye es la de 2 cintas
c conductoras paralelas a potenciales +10V y -10V
c y un conductor circular descargado atrapado entre
c medio de ellas.
c
c La extensión a otras geometrías es directa.
c Sebastian Otranto (2017)
